### Interior Cleaner for all interior surfaces

Aircraft Interior Cleaner is a highly concentrated, neutral pH cleaner for all interior surfaces. It easily cleans stubborn stains from fabric, carpet, vinyl and leather surfaces.

Aircraft Interior Cleaner uses the latest "dry-foam" surfactant technology to lift dirt and grime. Other cleaners often use cheaper surfactants that can leave a sticky residue on carpet and fabric fibers. This causes the carpets to attract dirt and grime and the carpets get dirty again faster.

Dry-foam surfactants do not leave a sticky residue behind. Instead, any residue dries to a light friable powder that does not attract dust or dirt, thus keeping the fabric and carpets cleaner for longer periods of time.

This product is highly concentrated. Dilute Aircraft Interior Cleaner using 64 parts water to 1 part cleaner. At this dilution ratio, the product is still a high-foaming product. It can be used through a foam gun to quickly apply product to large areas without saturating the fabrics with water.

Aircraft Interior Cleaner has been testing by an independent lab and does not change the flame characteristics of the fabrics and carpets. It easily exceeds the requirements of the Vertical Flammability Test.

#### Directions

1. Dilute product 64 parts water to 1 part cleaner.
2. For best results, apply a foam gun. Do not over wet.
3. Scrub area with a stiff brush or cloth.
4. Vacuum area using a wet/dry vacuum.

### Key Features

- Highly Concentrated
- Neutral pH
- Low VOC formula
- High foaming "Dry Foam Tech"
- No sticky residue left on carpets & fabrics
- Cleans all interior surfaces, including carpets, fabrics, vinyl, and leather.

### Specifications

Aircraft Interior Cleaner has been testing by an independent lab and meets the qualifications for:

- Vertical Flammability Test
